Web Application Penetration Testing Audit Completion Certificate

Testing Start Date : 11th-August-2025
Testing End Date : 14th-August-2025
Date of Issue : 22nd-August-2025
Validity of Certificate : 1 Year
Subject : Completed VAPT of Web for M/s Blowbits Solutions LLP.
Audit Scope : <https://gsp.octagst.com/>
Hash Value : 92220f9e4f889ecf9505fe0e788883f9025aa07e323b20faf21617646e09193
Name of Auditor : Mr. Raj Shekhar More

CONCLUSION

The above site has undergone Security Audit and has been certified to be safe from vulnerabilities. The contents audited were based on the temporary site URL mentioned above.

Note -: However, Vulnerability Name as Missing CSP Header is open (Due to technical constraint of Application on server).

The Web application was tested and found safe for hosting as per OWASP Application Security Verification Standard.

The Safe Hosting Certificate is issued considering that no unauthorized changes are made to the application or its environment. Any deviation may render the certificate void.

RECOMMENDATION

1. Ensure all software components (e.g., PHP 8.2, Laravel) are updated to their latest stable versions.
2. Web Server Audit certificate, web server and OS level hardening need to be in place for the production server before making the website live.
3. No new web pages are to be added without proper security audit.
4. No new features or code should be deployed without undergoing a security audit.
5. SSL deployment is suggested on the production server for further enhancing the security.
6. Firewall Configuration Audit should be done at least once a year or when there is a change in the Network Component.
